

2016 Dondero Park Improvements

The City of Royal Oak is making improvements to Dondero Park using federal funds from the Community Development Block Grant (CDBG) program. Dondero Park is located north of 10 Mile Road and west of Campbell Road, at the intersection of Dondero Avenue and Hoffman Avenue.

This project includes resurfacing the basketball and tennis courts, and the baseball diamond and outfield will also be regraded. In addition, new tennis nets, basketball hoops and baseball bases will be installed. This work is scheduled to take place throughout the month of August and September 2016. The tennis and basketball courts will be open to the public shortly after the resurfacing work is complete. The baseball field will remain closed this fall to allow the outfield grass to take root.
