Notice of Construction

2018 Asphalt Resurfacing Improvements

The 2018 Asphalt Resurfacing Improvements project will be performed this summer near your home to improve road conditions as part of the city's road millage. A map of the streets to be resurfaced with asphalt are shown in blue on the back of this letter. Construction is anticipated to begin in **April 2018** and extend through **September 2018**. Work is currently not scheduled for Sundays or holidays. The project contractor is AJAX Paving Industries, Inc. of Troy, Michigan.

Scope of work: Construction work will include: replacing deficient curbing, milling of the existing pavement, resurfacing the roadway with new asphalt pavement, removal and replacement of some sidewalk ramps and driveway approaches, and lawn restoration.

Parking: During construction, there will be lane restrictions to allow for construction equipment and residential access. "No Parking - Tow Away Zone - 7:00a.m. - 8:00p.m." signs will be posted 12 hours in advance where required to allow for various construction operations. Each street may be temporarily closed on the day the asphalt pavement is placed, and residents will be notified of any closures.

Driveways: Some driveway approaches will be removed and replaced as part of this project. When this occurs, the contractor will provide residents with a door-hanger notice the day beforehand, and the use of the driveway approach will be unavailable for up to 10 days for removal, replacement and curing of the new driveway concrete. **Please DO NOT move barricades or drive on new concrete until the barricades are removed by the contractor. Property owners who remove barricades and drive on the new concrete may be billed for the repair cost.**

Restoration: This project is not expected to significantly affect adjacent lawns and landscaping. Where lawn areas have been damaged by the contractor's operations, the disturbed areas will be replaced with topsoil and seed. Restoration of the lawn areas disturbed by the construction may not begin until after Labor Day, depending on the weather. The city does not replace special landscaping, brick, timbers, or plantings placed on the city's property. The contractor will make every effort to avoid damage to specialty landscaping.

Private Sprinkler Systems: Systems located between the sidewalk and road must have the sprinkler heads and lines **marked by the homeowner by April 16, 2018 prior to the start of construction**. Sprinkler systems that are not marked at the time of construction and are damaged will not be repaired by the contractor. The repair or replacement of damaged unmarked sprinkler systems will be the responsibility of the property owner.

Trash & Recycling Pickup: There will be no change in the trash and recycling schedule unless otherwise notified by the city.

The city realizes this construction will be an inconvenience, and all efforts to expedite this work will be utilized to minimize traffic conflicts and provide residential access.
